Configuresoft Adds EMC Corporation's Microsoft Practice to Alliance Program

Configuresoft Provides EMC Microsoft Consultants with a 'Rapid Assessment' Toolset For Consulting Engagements

COLORADO SPRINGS, CO —November 15, 2006— Configuresoft, the leading enterprise server configuration management solutions provider, today announced that the Microsoft Practice of EMC® Corporation has joined Configuresoft's Rapid Security Configuration Assessment (RSCA™) community.

As a member of the RSCA community, the EMC Microsoft Practice has access to Configuresoft's toolset of services for performing assessments of the Microsoft-based IT environments of its large to medium-size customers.

John Hollinger, Vice President and General Manager of the EMC Microsoft Practice, said, "The Configuresoft toolset helps accelerate the infrastructure discovery and assessment process by providing EMC consultants with a wealth of information on our customers' Microsoft-based IT environments, including the state of their regulatory, security and configuration compliance."

Configuresoft's RSCA provides the EMC Microsoft Practice with a toolset to collect information on a customer's Microsoft-based architecture and evaluate it against recommended settings. Leveraging regulatory mandates, security guidelines and accepted industry best practices as the baseline, the assessment is conducted on a representative sample of systems to understand overall enterprise compliance and identify deficiencies in operational policies and technical controls.

"We are delighted to welcome the EMC Microsoft Practice into our rapidly expanding family of blue chip business relationships which include Siemens Business Services, IBM, EDS, and Microsoft," said Mark K. Rupert, president, CEO of Configuresoft. "This announcement is another milestone in the expansion of Configuresoft's footprint and reach in the Security and Operations Management marketplace."

About Configuresoft

Configuresoft is an innovator in systems management technology, delivering the enterprise Configuration Intelligence™ to effectively and efficiently manage today's heterogeneous computing infrastructures. Spanning both security and operations, the Company's configuration management, compliance and remediation products are used by 12 of the world's 25 largest

companies to keep their critical systems properly configured, while ensuring compliance with regulatory requirements such as Sarbanes-Oxley, FISMA, GLBA, Basel II, HIPAA and DISA, and industry standards such as ISO 27001, PCI DSS and Microsoft Security Hardening Guides. To contact Configuresoft, please call (888) U-CONFIG or visit www.configuresoft.com.

Configuresoft's RSCA, used by several partners including Microsoft, provides executives with insight regarding the state of security and operational compliance within their enterprises, while outlining detailed recommendations for securing and hardening their systems. As part of the alliance Configuresoft will provide a training and certification program, as well as support, to EMC employees designated to use the RSCA services.

The RSCA engagement is founded on the expertise provided by Configuresoft's Center for Policy & Compliance (CP&C). The CP&C provides a framework for the RSCA engagement as well as ECM toolkits based on various industry and federal regulations and security best practices.
