CONFIGURESOFT CO-FOUNDS PCI SECURITY VENDOR ALLIANCE

Data Security Firms Aim to Assist Members of the PCI by Providing Products and Services that Enable Organizations to Achieve full Compliance with the PCI DSS

Colorado Springs, CO — January 30, 2007 — Configuresoft, an innovator in systems management technology and the creator of enterprise Configuration Intelligence™, today announced its participation as a founding member of the Payment Card Industry (PCI) Security Vendor Alliance (SVA). The PCI SVA has concluded that the PCI DSS represents the most comprehensive set of data security and privacy requirements available through a set of guidelines for protecting confidential data throughout the value chain of ANY industry. Collectively, the members of the PCI SVA offer merchants, financial institutions and card processors a wide range of alternative products to help them achieve PCI DSS compliance.

"The payment card industry has done a great service to consumers by passing the data security standard, however, it has been widely reported that adoption is slow," said Chris Farrow, director of Configuresoft's Center for Policy and Compliance. "The PCI SVA will not only demonstrate the business value and technological viability of PCI DSS compliance, but will provide programs to effectively and efficiently guide merchants in protecting their customers' data."

The founding members of the PCI SVA, Configuresoft, Cyber-Ark, Modulo Security, Proginet, Protegrity, Reflex Security, SafeNet and VeriSign, represent industry expertise from all facets of data security and network operations. Members of the PCI SVA are typically brought in by a merchant or financial institution after a PCI DSS assessment, in order to help the organization achieve compliance with PCI DSS.

About the Payment Card Industry Security Vendor Alliance

The mission of Payment Card Industry (PCI) Security Vendor Alliance (SVA) is to assist the members of the payment card industry and the PCI Security Standards Council, whose members are merchants, banks and POS vendors, by providing products and services that enable these organizations to achieve full compliance with the PCI DSS. The PCI SVA will also complement

the objectives of Visa, MasterCard, American Express, Discover and JCB by helping educate the payment card industry about the business value of achieving PCI DSS compliance.
