**MEDIA ALERT**

**Configuresoft Founder/CTO to Speak at Cloud Slam 09**

*Noted Cloud Computing Expert Dr. Dennis Moreau to Address Security, Compliance and Trust in Coupled Environments*

**Colorado Springs, CO — April 21, 2009** — Configuresoft, Inc., a leading provider of [enterprise server configuration management](#) solutions for physical and [virtual environments](#), today announced the following special presentation by Configuresoft virtualization technology experts:

**WHO:** Dr. Dennis Moreau, CTO & co-founder, Configuresoft

**WHAT:** Presenting at [Cloud Slam 09](#), Cloud Computing Virtual Conference  
*Session Title:* Security, Compliance and Trust in Cloud: Coupling Issues  
The session will include Q&A for participants.

**WHEN:** 3:00 p.m. PDT, Wednesday, April 22

**WHERE:** Virtual event at <http://tinyurl.com/cq7lkn>

**WHY:** “Cloud computing promises major agility, hosting and implementation advantages for an innovative class of applications and services,” Moreau said. “But, it also introduces some new complexities in the areas of validating security posture, assessing regulatory and statutory compliance, establishing coherent trust levels across the service stack and modeling risk across more coupled assets and service composition. In this session, we’ll establish the technical basis for this complexity and the informational/methodological basis for effectively addressing it in emerging hosting environments.”

For more information about the session, go to <http://cloudslam09.com/content/schedule-cloud-slam-09-conference-156.html>.
